Information Regarding Your Visa-Branded Debit Card

Non-Visa Debit Transactions processing. We have enabled non-Visa debit transaction processing. This means you may use your Visa-branded debit card ("card") on a PIN-Debit Network* (a non-Visa network) without using a PIN. The non-Visa debit network(s) for which such transactions are enabled are STAR and ACCEL/Exchange Networks.

Examples of the types of actions that you may be required to make to initiate a Visa transaction your "card" include signing a receipt, providing a card number over the phone or via the Internet, or swiping the card through a point of sale terminal. Examples of types of actions you may be required to make to initiate a transaction on a PIN-Debit Network include initiating a payment directly with the biller (possibly via telephone, Internet, or kiosk locations), responding to a logo displayed at a payment site and choosing to direct payment through that network, and having your identity verified using known information derived from an existing relationship with you instead of through use of a PIN.

The provisions of your agreement with us relating only to Visa transactions are not applicable to non-Visa transaction. For example, the additional limits on liability (sometimes referred to as Visa's zero-liability program) and the streamlined error resolution procedures offered on Visa Debit card transaction are not applicable to transactions processed on a PIN-Debit Network.

*Visa Rules generally define **PIN-Debit Network** as a non-Visa network that typically authenticates transaction by use of a personal identification number (PIN) but that is not generally known for having a card program.
